About Macfadyen Design & Build Inc.

Established in 1979, MacFadyen Design and Build Inc. is a respected design and general contracting firm which specializes in custom home renovations and remodeling. The company offers a full range of services, from design and working drawings, to general service and maintenance, as well as full scale remodeling and construction projects. In addition to home renovations, the company is extensively experienced in office and retail renovations.

Our own experienced staff will oversee the project and complete much of the work ourselves. Where needed, we bring in proven sub-contractors to assist us in areas like mechanical and electrical. Our suppliers work with us to provide the most appropriate materials for the job on a timely basis.

Whether you are interested in historical conservation and restoration, or contemporary styling, our team of professionals will work with you from start to finish to ensure your project is both functional and aesthetically pleasing, at a price you can afford.

The Process

What people are saying...

"Macfadyen Design & Build has completed a number of different projects for the Department of Public Works over the past year.

All our projects have been completed on time, and within budget, resulting in the satisfaction of our clients. Their quality of work has been impeccable as well as their approachability with respect to extra work required.

I would recommend them highly to anyone requiring renovation work."

Terry Maslen

The Logos pictured on our Home Page indicate some associations of which we are a member. These include the London Home Builders Association, the London Construction Association, Renomark, the Canadian Federation of Independent Business, the Better Business Bureau of Western Ontario, and the Tarion Warranty Corporation. We are fully insured, including coverage under the Workplace Safety and Insurance Board. These coverages and Association connections help assure you of our long-time presence and reputation in the Industry.

To learn about the process involved in a typical project, check our "The Process" section.
