Bathroom Renovation

We provide everything from complete bathroom renovations, bathroom remodeling, custom glass shower stalls, glass steam/spa enclosures, bathroom upgrades, custom cabinetry and radiant floor heating, the list of services is extensive.

We can provide, design and install custom bathroom renovations. We are the London bathroom renovators providing you with "turnkey" bathroom remodeling (we provide all fixtures and tiles as well, you do not have to supply your own unless you wish to).

As well, Macfadyen Design & Build have the capability and expertise to design/build wheelchair-accessible bathrooms and/or universal- access bathrooms for your home. They need not look institutional as they can be furnished with almost any luxury fixtures/tiles and finishes and still be totally "ergonomically friendly".

We regularly remove existing bathtubs and replace them with barrier-free showers with built-in seats/benches, grabbars/support bars and easily-accessible shower valve

Project Map

The Process

controls that are both beautiful and functional.

Your bathroom can be custom-built for your mobility needs both for the present and taking into consideration future mobility challenges.
