Basement Renovations

Have you maximized the potential of your basement? If not, you may want to talk to us. Macfadyen Design & Build Inc. also specializes in basement renovations, and we can show you how to make the most of this space.

Solutions to Common Basement Problems:

No matter the size or layout of their home, people all seem to face the same kinds of challenges with their basements. In finished basements, we often hear that there is not enough light or that the room is too cold. We also have clients asking for more storage space or an extra bedroom or office. If the basement is unfinished, clients typically ask for a full renovation, from design to project completion.

Our experienced designers, architects and trades people can take your unused or underused basement and transform it into a warm and welcoming space for your entire family.

If you are seeking additional living space, we can add anything from a small bedroom to a complete in-law suite.

Project Map

The Process

Our services include everything from the "infrastructure" to the final build:

- **Design and Engineering** – We provide complete solutions from start to finish, including design consultations and planning, permits, and structural engineering.
- **Infrastructure** – Plumbing, HVAC, electrical wiring – we manage all of the trades required to get the basics done first.
- **Carpentry** – From framing to finish carpentry and new stairs or handrails, our team of journeymen carpenters has an eye for detail and a reputation for outstanding workmanship.
- **Recreation** – Create a fun living space for your family: a home theatre, games room or just a big open play space with lots of storage for toys. We will design a room that meets your goals.
- **Bathrooms** – Add a tiled shower or sauna to your basement bathroom. We can carry out all the design and specialized tile work.
- **Storage space** – We can design specialized storage spaces that allow you to keep your basement tidy and organized.
- **New windows and walkouts** – Brighten your basement with more natural light, or add a walkout to the backyard.
- **Add warmth** – Radiant floor heating and gas fireplaces are among the many ways you can take the chill out of your basement.

With our attention to detail and dedication to providing work of the highest quality, you can count on Macfadyen Design & Build to deliver what we promise. Our work is performed by award-winning designers and architects. Our trades people are certified and we provide local licensing, company insurance, WSIB coverage and all other documentation you need to feel completely confident in our abilities and professionalism.
